INCEILING MULTIFORMAT

Base from 203 cm to 305 cm.

Inceiling multiformat is the screen with most performance in the inceiling line. The casing contains 2 motors, placed one in front of the other. Thanks to the new motors with incorporated encoder and integrated control units, the two surfaces, one black and one for projection, can be set in upto 9 format combinations.

SCREENLINE

CLR - UST

Aluminum rigid frame screen designed specifically for ultra-short-throw projectors. The serriform microstructure on the surface of the screen repels ambient light, particularly light from the ceiling, and retains light emitted by the projector, improving image contrast and color saturation.

ARENA

ARENA is the cylindrical screen for total immersion projections. The cylindrical shape makes it possible to obtain a visual surface which surrounds the onlooker, transmitting the feeling of being totally immersed in the virtual environment projected. It requires a projection system made of more than one projector and an electronic control unit able to create only one image. A custom-made solution that ScreenLine realizes depending on the customer's requirements. Its dimensions range from 4.50 m to 12 m diameter and a curvature variable from 30° and 360°, according to the need

Below 3 examples of small, medium and large arenas.

TERMS AND CONDITIONS

Definitions

For the purposes of the present general Sales Terms (hereinafter referred to as "**Sales Terms**"), the terms below will have the following meanings:

"**Screenline**": Screen Line Srl;

"**Customer**": any company, body or legal entity which purchases Screenline's products from the latter;

"**Products**": the goods produced, assembled and/or sold by Screenline;

"**Order/s**": each proposal of purchase of the Products submitted by the Customer to Screenline exclusively via fax or e-mail;

"**Sale/s**": each sales contract stipulated between Screenline and the Customer after the latter receives written authorisation of the Order by Screenline;

"**Brands**": all brands Screenline owns, is sole licensee for or exclusive distributor of;

"**Intellectual Property Rights**": all Screenline's intellectual and industrial property rights, included, without any restriction, the rights concerning: Patents for Inventions, Drawings or Models, Utility Models, Brands, Know-How, Technical Specifications, Data, whether such rights are registered or not, as well as any request or registration concerning such rights and any other right or protection form of similar nature or having equivalent effect.

Purposes

2.1 The present Sales Terms apply to all Product Sales. In case of contrast between the terms in the Sales Terms and possibly the terms agreed in the single Sales Contract or in a Specific Contract, the latter shall prevail. Without previous written acceptance from Screenline, the Customer shall not agree upon any different General Purchase Terms (referred to as "GPT"), even if they are referred to or are included in the Orders or in any other documentation coming from the Customers themselves. The GPT will not be binding for Screenline even under implied consent.

2.2 Should the Sales Terms be modified, integrated or partially eliminated in some points and/or topics, Screenline shall inform the Customer about such changes. Any possible modifications shall therefore enter into force from the 30th day following the notification to the Customer. It is understood that such extensions, modifications or deletions shall apply to all closed Sales.

Orders and Sales

3.1 The Customer shall submit specific orders to Screenline, containing the Product description, the requested quantity, the price and the terms requested for the delivery.

3.2 The acceptance of the Order by Screenline shall be made in accordance with the instructions and guidelines given to the sales commercial department. It is however explicitly agreed that the Orders submitted by the Customer may be refused in case:

- The Proposal does not technically correspond to the system offered by Screenline or it is not, for other reasons, feasible;
- There is not the necessary time to fulfil the requested service;
- Screenline believes that the Customer is not solvent;
- Terms such as prices or discounts included in the order do not match the latest instructions given by Screenline;
- The material or the product is out of production.

In all other cases, the order must be considered accepted unless a different communication is sent. The assignation of the quantities for sale shall be made in accordance with Screenline's availability, everything at **its own** unquestionable judgement. As a consequence, no claim for any title or cause can be made by the Customer in case Screenline is not able to meet the Customer's requirements.

3.3 Orders regularly accepted by Screenline cannot be cancelled by the Customer without Screenline's prior written consent.

Price of the Products

4.1 The prices of the Products shall be the ones indicated in the Screenline Price List in effect at the time of the placement of the Order. In case a Product does not appear in the Price List, the price indicated in the estimate and confirmed in writing by Screenline shall be referred to. Prices will be calculated ex-works and exclude VAT and discounts. Such prices do not include costs of shipping from Screenline to the Customer. Such costs shall be paid for by the Customer separately.

4.2 Screenline shall keep the property of the Products until their payment is completely honoured.

4.3 Screenline reserves the right to unilaterally modify without notice and with immediate effect the prices in the Price List in case the adjustment is due to circumstances beyond Screenline's control (e.g. rise in the price of raw materials or in the cost of labour, exchange rates changes). In all other cases, the modification shall be notified to the Customer and be effective on all Orders received by Screenline from the 30th day following the date when the modifications have been notified to the Customer.

Delivery Terms

5.1 Except from what possibly differently agreed in writing between the parties, Screenline shall deliver the Products <<ex-works>> at its own factory, as defined in the INCOTERMS 2020 (International Commercial TERMS), i.e. the international commercial terms which unequivocally define responsibility, costs and obligations which refers to single subjects involved in a merchandise transaction among different nations. The INCOTERMS published by the International Chamber of Commerce, in their most updated version and in force at the moment of the delivery, shall be referred to. If requested, Screenline will take care of the transport of the Products charging the Customer for the cost and the risk.

5.2 Delivery shall be within the term indicated in the Order as accepted in the Order Confirmation or, in case the term is not indicated in the Order, within 30 days from the first working day following the confirmation of the single Order. The delivery terms are approximate and are not essential terms according to art.1457 of the Italian Civil Code and, in any case, they do not include shipping terms. For islands or places difficult to reach delivery terms may vary.

5.3 Except for the provisions in the previous art.5.2, Screenline shall not be responsible for delays or delivery failure due to circumstances beyond Screenline's control, such as, purely by way of example and without claiming to be exhaustive:

- a) Inadequate technical data, imprecisions or delays of the Customer in the transmission of information or necessary data for the shipping of the Products;
- b) Difficulties in obtaining raw materials;
- c) Problems related to Order production or planning;
- d) Total or partial strikes, lack of electricity, natural calamities, measures imposed by the public authorities, difficulty in shipping, public disorder, terrorist attacks, and all other causes of force majeure;
- e) Natural calamities affecting the production area or the delivery region;
- f) Delays of the carrier.

5.4 The occurrence of some of the events above will not give right to the Customer to request compensation for the potential damages or any reimbursement whatsoever.

Transport

6.1 Except for what differently agreed in writing between the parties, shipping shall always be at the expense and risk of the Customer. Should Screenline, in compliance with art.5.1, be requested to carry out the transportation of the Products, in case of no instructions from the Customer, Screenline shall choose the means of transport thought to be the most appropriate.

Payment

7.1 Unless otherwise agreed in writing between the parties, Screenline, at its discretion, shall issue the invoices at the time of the acceptance of the Order or of the delivery of the Products.

7.2 Payments shall be made in Euros within 30 days from the last day of the month in which the invoice was issued.

7.3 The failure to pay within the agreed time or any delay shall give Screenline the right to ask the Customer the payment of the interests due at the rate fixed by the Legislative Decree no.231/02.

7.4 Failure to pay or the delay in the payment over 30 days shall give Screenline the right to suspend the delivery of the Products and withhold every single subscribed Sale. The suspension of the delivery of the Products or the cancellation of the Sales will not give the Customer the right to claim any compensation for loss or damages.

7.5 Any complaint concerning the Products and/or their delivery will not justify the suspension or the delay of the payment.

7.6 Screenline shall keep the property of the Products until the supply has been fully paid in every individual Order. If Screenline accepts payment on credit, the payment shall only be considered fulfilled once all instalments have all been paid or cashed.

Non-Conformity

8.1 Any difference of the Products delivered to the Customer from the type of product and quality indicated in the Order shall be reported in writing to Screenline within 15 (fifteen) days from delivery date. In case no complaint is made within such term, the delivered Products shall be considered in compliance with the Products ordered by the Client.

Warranty

9.1 Except for a different written agreement between the parties, Screenline guarantees that the Products are free of flaws or defects (excluded those parts of the Products which are not produced by Screenline) for a period of 24 months (twenty-four months) starting from the date of delivery of the Products to the Customer and of 5 years (five years) for the electric motors.

9.2 The warranty shall not cover the Products whose defects are due to:

- a) Damages caused during shipping;
- b) Careless or improper use of the same;
- c) Failure to follow Screenline's instructions concerning the Product operation, maintenance and storage;
- d) Repairs and modifications made by the Customer or by third parties without previous written authorization by Screenline.

9.3 Provided that the Customer's complaint is covered by warranty and notified within the terms in compliance with the present article, Screenline shall commit, at its discretion, to replace or repair each Product or the parts of the Product which are flawed or defected.

9.4 The Customer shall report to Screenline in writing the presence of hidden flaws and defects within 15 days from the delivery of the Products if the complaint is about evident flaws and defects, or, within 30 days from the discovery in case of hidden flaws and defects, not detectable by authorized personnel.

9.5 The complaint shall be immediately forwarded to Screenline factory in order to let Screenline carry out the necessary checks. The warranty does not cover damages and/or flaws of the Products due to anomalies caused by or connected to parts assembled/added directly by the Customer or by the final customer. If, within the present warranty, a Product or a faulty component is replaced the property of the Product or of the replaced component shall be transferred back from the Customer to Screenline.

9.6 In any case, the Customer cannot enforce their warranty rights towards Screenline unless the price of the Products is paid at the terms and conditions agreed upon, also in the case the failure to pay at such terms and conditions refers to different Products from the ones for which the Customer intends to enforce the warranty.

9.7 Screenline does not recognize any warranty for the conformity of the Products to the rules and regulations of Countries which are not part of or do not belong to the European Union. No other warranty, either expressed or implied, e.g. the guarantee of good functioning or eligibility for a specific purpose, is granted referring to the Products.

9.8 Without prejudice towards what indicated in previous art.9.3 and except for the case of fraud or gross negligence, Screenline shall not be responsible for whatever damage arising from and/or connected to the Products defects. In all cases, Screenline shall not be held responsible for indirect or consequential damages of any kind, e.g. the losses resulting from the Customer's inactivity or a loss of earning.

9.9 In case the same defect of a Product recurs repeatedly and is due to the same cause over the period of 12 months from the delivery of the Products to the final customer and, in any case, not after 24 months from the delivery to the Customer, Screenline shall refund, within the limitations of following art.9.10, all direct damages sustained by the Customer and conveniently documented inside a campaign of withdrawal of the faulty Products from the market, and every other additional cost related to the repairing and the replacement of the Products, provided that the Customer has reasonably engaged to limit the losses that Screenline might undergo. The Customer shall follow Screenline instructions for the withdrawal of the Products from the market.

9.10 In all cases, the right of the Customer to the compensation for the damages shall be limited to a maximum amount equal to the value of the defected or faulty Products.

Intellectual Property Rights

10.1 The Intellectual Property Rights belong completely and exclusively to Screenline and their communication or use within the present Sales Terms does not give rise to any right or claim by the Customer.

The Customer undertakes not to perform any incompatible act with the ownership of the Intellectual Property Rights.

10.2 The Customer declares that:

- (A) Screenline is the exclusive owner of the Brands;
- (B) They shall abstain from using and registering brands which are similar or may be confused with the Brand;
- (C) They shall use the Brands exclusively in compliance with Screenline instructions and exclusively for the purposes within the present Sales Terms.

Express Termination Clause

11.1 Screenline shall have the right to terminate, according to art.1456 of the Italian Civil Code, at anytime by means of written notice to be sent to the Customer, the single Sale in case of breach of obligations required by articles: 4 (Price of the Products); 7 (Payments); 10 (Intellectual Property Rights).

Change in Capital Conditions

12.1 Screenline shall have the right to interrupt the fulfilment of the obligations arising from the Sales of the Products according to art.1461 of the Italian Civil Code, should the Customer's capital situation become such as to put in serious danger the due payment, provided that a suitable warranty is given.

Legal Residence, Applicable Law and Jurisdiction

13.1 Screenline is legally resident at its head office.

13.2 Sales Terms and each single Sale shall be regulated and interpreted in compliance with the Italian Law with the exclusion of the United Nations Convention on Contracts for the International Sale of Goods (Vienna 1980).

13.3 All controversies arising from or connected to the present Sales Terms and/or every Sale will be subjected to the exclusive jurisdiction of Tribunale di Trento.

13.4 Except for what agreed in previous art.13.3, Screenline reserves the right, when promoting a single legal action as the actor, to promote such action in the Customer's residence place, in Italy and abroad.

Screen Line Srl.

TERMS AND CONDITIONS

Material

Screenline projection screens are manufactured with high quality materials.

The viewing area features a microscopic knurled surface. Such embossing allows perfect distribution of the light and colour homogeneity.

The surface of Screenline screens is made of polyvinyl chloride (PVC), a material which can be moulded and stays stable and safe over the years.

The surfaces are certified in accordance with the RoHS (Restriction of Hazardous Substances) Directive, in compliance with the 2002/95/CE regulations. The RoHS Directive certifies that the surfaces do not contain any toxic materials such as lead, mercury, cadmium, hexavalent chrome, polybrominated biphenyls, polybrominated diphenyl ether.

Prices

The figures displayed in the present Price List are in EURO currency, excluding VAT and meant ex-works.

The Price List applies to all orders which arrive subsequent to the date of validity of the Price List itself.

Measurements

All sizes and measurements in the Price List are in centimetres (cm).

The measurements indicated in each product chart refer to the viewing area.

All sizes can have a tolerance up to +/- 1% of their total measurement.

In order to improve and develop the product, Screenline might make changes to the products, therefore some technical characteristics or some dimensions may be changed and such changes will be reported in the order confirmation.

Images

The images and drawings in this Price List which refer to the sales products are simply descriptive and in some cases they may be varied.

The colours and the appearance of the products reported in the pictures are as close to reality as possible; nonetheless they might result different from reality due to printing process limits.

General Information for Screens

Screenline screen characteristics may vary according to the surface typology, the cloth and also the kind of supports used.

The screens are directly produced and assembled in Italy at Screenline's headquarters in Besenello (Trento).

Each screen is checked and verified in all its components and functions in order to ensure the highest quality.

LARGE SCREENS

On large screens -according to the surface typology- there may be a micro welded horizontal seam. The welded line made by Screenline may be visible depending on the size of the screen and the distance of vision.

On Maximilian screens the welded line is vertical.

For those screens which bear a welding, the connection of the two surfaces will always be as high as possible in relation to the viewing area. Upon customer's request, the welding can be positioned in another part of the screen provided that the production criteria are met.

If a welded screen is placed in front of light sources such as windows or direct or indirect artificial lights, some slight infiltrations of light might be visible along the welded seam. This situation does not constitute a complaint. The surface will not act as a curtain which darkens the room and putting it near heat or light sources should be avoided.

SEMI-TRANSPARENT SCREENS

Since Screenline surfaces for rear-projection are semi-transparent, they might reveal some slight smoothing along the welded line.

PERFORATED AND MICRO-PERFORATED SCREENS

Perforated and micro-perforated surfaces may generate some slight distortions i.e. Moiré Effect. Should this occur, it will not be considered a flaw.

TENSIONED SCREENS

Screenline "Tensioned" screens have two side strips which keep the projection surface tightened. These strings go down parallel to the surface.

HOURGLASS EFFECT

In motorized screens it is normal to perceive a slight hourglass effect due to the tension of the surface caused by the counterweight. This tension guarantees a well-flat screen without wrinkles.

In framed screens it is possible that once the installation is completed (i.e. the surface-frame coupling), the screen may present slight distortions of shape, like an hourglass. We guarantee that this projection light distortion will always be less than 2% for standard formats.

Use of the products

In order to perfectly design a video system and have neat and clear images, it is important to identify the characteristics and the dimensions of the screen.

The visual resolution must be appropriate to the size of the images which will be projected e.g. films, videos, presentations, charts, diagrams, technical drawings, 3D images, photographs, etc...

According to the kinds of projection, the screen sizes may vary (width and height). In particular, in order to improve the visualization of professional installations, it is fundamental to consider some elements:

the distance (D) between the screen and the least favoured viewer (LFV, the position from which one has the least direct view of the presentation screenshot)

the kind of application, if the screen is mainly used for projections of videos, PC presentations or diagrams/charts/drawings.

The aspect ratio

To obtain the height (H) of the screen all you need to do is calculate the distance between the screen and the LFV (the position with the least direct view of the screenshot) and divide it into 6 for computer presentations or into 4 for graphics, charts and drawings. In the presence of light sources such as windows without dimmers or artificial lights switched on, the quality of the projected image might be affected.

Cleaning and maintenance of the screens

In order to clean Screenline screens, a soft cloth or a sponge should be used after dampening them with a non-aggressive neutral detergent. The detergent must be sprayed on the cloth and not on the surface.

When cleaning, all degreasing products containing alcohol, acetone, solvents, acids or bleach must absolutely be avoided. The use of fiberglass, rough metallic brushes and pressure water jet is highly advised against.

Do not clean the <<Radiance>> surface either with cloths or with water and/or detergent because any product used would damage the treated surface.

Installation and Set up

Screenline screens and accessories must be installed by industry professionals or by technically prepared staff following the installation and maintenance procedures included in the instructions that come with the product.

Use the screen in accordance with Screenline factory settings without making any change whatsoever.

The modification of the limit switch is authorized only upon communication to Screenline and only and exclusively to shorten the limit switch up to a maximum of 20cm. Make sure that the home automation you are going to use is compatible with the motors used for the screen automation.

If the screen is to be moved from a room to another where the temperature is completely different (very cold, very hot), before opening the screen wait until it has got acclimatized to the temperature of the room where it is placed. We recommend to wait at least 120 minutes before opening it.

Install the screen far from heat sources (heaters, radiators, stoves, chimneys, radiant panels, windows exposed to the sun facing south, south-west, west) or from anything that produces direct heat.

Do not stop the screen with the remote control halfway down. Once the command is activated, let the screen roll down or roll up to the limit points.

Screen Warranty

Screenline guarantees that the products distributed through its own official channels i.e. agents, authorized wholesalers and installers or agreed e-commerce sites are free of factory flaws.

The screens are guaranteed for a period of twenty-four (24) months starting from the invoice date.

The motors of the screens are guaranteed for five (5) years starting from the invoice date if the electrical connection is made by professional technicians.

Please read and required "Screenline products warranty"

Warranty Terms

It is important to respect the warnings when transporting, storing and activating the screen.

In particular:

The screens must always be transported horizontally. They must never be stored vertically.

Screenline screens warranty, both for frame and motorized screens, is subject to Terms and Conditions, point 9 WARRANTY.

The Warranty expires if:

the product has been used or handled differently from the instructions indicated inside the product information;

the product is damaged for improper use or abuse;

there are damages caused by accidents or negligence during transport;

the damage is due to bad repairs;

the limit switch adjustment of the motor was tampered with.

Transport

Screenline screens are shipped in corrugated cardboard boxes. The structure ensures perfect resistance against possible perforations, granting the safety of the product.

Moreover, the corrugated cardboard is a practical and ecologic material, easily disposable and reusable.

For large Maximilian screens, wood packaging boxes are used.

Screenline offers the "tracking" service which allows tracking the parcel anytime during the whole journey and being informed about the day of delivery and possible delays.

Shipping to the main islands i.e. Sicily, Sardinia and Corsica have a supplementary cost according to the typology and size of the screen.

Returns

No product can be returned without previous authorization from Screenline.

Products must be returned in the original packaging or in an equivalent one in order to avoid damages during transport. Shipping damages caused by inappropriate packaging are not covered by warranty.

The returned product must be accompanied by a detailed description of the flaw and a photocopy of the original invoice/receipt of the purchase. Products must not be returned before having had the approval from Screenline and received the document to apply to the parcel.

LEGAL NOTES

Screenline is a brand owned by Screenline Srl.

Without any written authorization it is forbidden to reproduce the present Price List totally or even partially.
